#### RECONCILIATION OF NET LOSS TO ADJUSTED NET LOSS AND ADJUSTED EBITDA (unaudited)

This press release contains two financial measures (Adjusted Net Loss and Adjusted EBITDA (Earnings Before Depreciation and Amortization, Interest and Taxes)) that are considered "non-GAAP" financial measures under applicable Securities and Exchange Commission rules and regulations. These non-GAAP financial measures should be considered supplemental to and not a substitute for financial information prepared in accordance with generally accepted accounting principles. The Company's definition of these non-GAAP measures may differ from similarly titled measures used by others. Adjusted Net Loss adjusts for specified items that can be highly variable or difficult to predict, or reflect the non-cash impact of charges resulting from purchase accounting. All adjustments are tax effected utilizing the federal statutory tax rate for the US, except for changes in the fair value of contingent consideration as the vast majority is non-deductible for tax purposes. Adjusted Net Loss margin is defined as Adjusted Net Loss divided by total revenues. Adjusted EBITDA reflects net income excluding the impact of depreciation, amortization, interest expense and provision for income taxes, excluding specified items that can be highly variable and the non-cash impact of certain purchase accounting adjustments. Adjusted EBITDA margin is defined as Adjusted EBITDA divided by total revenues. The Company views these non-GAAP financial measures as a means to facilitate management's financial and operational decision-making, including evaluation of the Company's historical operating results and comparison to competitors' operating results. These non-GAAP financial measures reflect an additional way of viewing aspects of the Company's operations that, when viewed with GAAP results and the reconciliations to the corresponding GAAP financial measure may provide a more complete understanding of factors and trends affecting the Company's operations that, when viewed with GAAP results and the reconciliations to the corresponding GAAP financial

The determination of the amounts that are excluded from these non-GAAP financial measures are a matter of management judgment and depend upon, among other factors, the nature of the underlying expense or income amounts. Because non-GAAP financial measures exclude the effect of items that will increase or decrease the Company's reported results of operations, management strongly encourages investors to review the Company's consolidated financial statements and publicly filed reports in their entirety.
